Learning For Self-Driving Cars and Intelligent Systems

Practical Course
Qadeer Khan, Prof. Dr. Daniel Cremers
Summer Semester 2021

Course webpage:
https://vision.in.tum.de/teaching/ss2021/intellisys_ss2021
Introduction

- Masters practical course
- Data modalities: images, GNSS, IMU, point clouds, sets, graphs etc.
- Programming assignments in the initial weeks
- Research oriented projects
- max. 2 persons per each group
- Dynamic research goals
- One-on-one meetings with supervisor(s) for updates and resolving issues
- Final Presentations
- Weekly summaries of the work progress
- Mondays, 10-12 pm [Most likely online]
- You will be provided access to the compute resources via ssh for this course.
Prerequisites

- Proficient in python programming
- Familiar with version control (git)
- Comfortable with DL frameworks: PyTorch, Tensorflow etc.
- Good knowledge of basic mathematics, linear algebra, probability, numerics, analysis etc.
- Participation in at least one of the offered deep learning lectures at TUM
Application

- Assignment to the course done via the matching system: [https://matching.in.tum.de/](https://matching.in.tum.de/)
- Select your preference of the lab course between 9 February to 16 February on the system
- Application documents to be sent separately
- **Send your CV and Transcripts by 16 February 2020 to:** [intellisys-ss21.vision.in@tum.de](mailto:intellisys-ss21.vision.in@tum.de)
- Please see the email format on the next slide
- We can only consider candidates who applied to the matching system **AND** sent their application documents
Application Email Format

In order to easily evaluate your profile for matching, we ask you to follow the format below:

Subject: Application [Your Matriculation Number]

In the body please give at least the following details:

- Matriculation #:
- Name:
- Name of Degree:
- Masters Semester #:
- Average Grade:
  - Bachelor:
  - Master (For the previous semester, if available)
- List of Relevant courses taken with grade

Please remember to also attach your CV and transcripts (Bachelor + Master) with the email.

Feel free to share any additional documents, information (for eg. link to git, past research projects) that could support your application. Optional: If you also have a project suggestion matching the theme of the lab course, please briefly describe.
Projects

- Practical project experience with real-world problems
- Novel application oriented research challenges
- Project Assignment to be done after the initial weeks of programming tasks
- Projects specifics will be decided later
- However, if you have project proposals prior to beginning of the semester. It may be considered
- Nevertheless, some general research areas can be found in the next slides
Projects

- Robot control
  - Embodied agents (Next slide)
  - Robustness to noisy data
  - Multiple Input Modalities
Projects

- Testing control algorithms on embodied agents
- Interaction with the environment
- Supervised, self-supervised, reinforcement learning
Projects

- Perception for self-driving cars
- Environmental understanding
- Localization

Accessed on: 05.02.2021
Projects

- Learning on Graphical Networks,
  - Social Networks, Internet, Molecules /Drug discovery etc.

Accessed on: 05.02.2021
